### Biosimilars: Safe and Effective Treatment Options

#### What are Biologics?

Biologics are specialty drugs used to treat long-term conditions like cancer, rheumatoid arthritis, skin conditions like psoriasis, multiple sclerosis, osteoporosis, and Crohn's disease. They can be costly. Biologics make up only 5% of prescriptions in the U.S. but account for 51% of total drug spending as of 2024.

#### What are Biosimilars?

Biosimilars are medicines highly similar to an FDA-approved biologic (the "reference product"). They work the same way and have no meaningful differences in safety, effectiveness, or quality.

Before FDA approval, biosimilars are tested to meet the same standards as the original biologic. Some biosimilars are interchangeable, meaning a California pharmacist can substitute a lower-cost biosimilar, just like they do with generic drugs for brand-name medicines.

For example, Humira is a widely used biologic for rheumatoid arthritis. Its biosimilar, Simlandi, works the same way and is interchangeable.

On average, biosimilars cost about 50% less than the original biologic. Using a biosimilar may give you more treatment options and help lower your drug costs.

If you have questions about a biosimilar or how it may affect your treatment, talk with your healthcare provider or pharmacist. **Learn more from the FDA: <https://www.fda.gov/drugs/biosimilars/biosimilars-basics-patients>**

### 生物相似劑：安全且有效的治療選擇

#### 什麼是生物製劑？

生物製劑是用於治療長期疾病的特效藥物，例如癌症、類風濕性關節炎、牛皮癬（銀屑病）等皮膚病、多發性硬化症、骨質疏鬆症及克隆氏症。然而，這些藥物的價格可能非常昂貴。截至 2024 年，生物製劑僅佔美國處方藥總量的 5%，卻佔藥物總支出的 51%。

#### 什麼是生物相似藥？

生物相似藥是與已獲美國食品及藥物管理局（FDA）批准的生物製劑（稱為「參考產品」）高度相似的藥物。它們有相同作用，在安全性、療效或品質方面沒有實質臨床差異。

在獲得 FDA 批准前，生物相似藥會經過嚴格測試，以符合與原研生物製劑相同的安全及品質標準。部分生物相似藥屬於「可互換」產品，這表示藥劑師可以在毋須取得新處方的情況下，以生物相似藥取代原研生物製劑。如在加州使用可互換的生物相似藥，藥劑師會通知您的醫療服務提供者。

例如，Humira 是一種廣泛用於治療類風濕性關節炎的生物製劑，其生物相似藥 Simlandi 的效用相同。Simlandi 已經過測試，符合相同的安全及品質標準，並且可與 Humira 完全互換。這代表藥劑師可以在毋須新處方的情況下進行替代，就像他們經常以非商標藥物代替商標藥物一樣。

平均而言，生物相似藥的價格約比原研生物製劑低 50%。使用生物相似藥或可為您提供更多治療選擇，並有助降低藥物開支。

如果您對生物相似藥或其可能對您的治療產生的影響有任何疑問，請諮詢您的醫生或藥劑師。如需更多資訊，請到 FDA 網站查詢：<https://www.fda.gov/drugs/biosimilars/biosimilars-basics-patients>

Some members may receive a **CAHPS (Consumer Assessment of Healthcare Providers and Systems)** survey asking about their health care experience. Participation is voluntary, responses are confidential and feedback helps improve care and services.

部分會員可能會收到 **CAHPS (醫療保健提供者與系統消費者評估)** 調查問卷，以了解您的就醫體驗。本調查為自願性質，所有回覆內容均嚴格保密。您的回饋將有助於我們提升醫療護理及服務品質。

# INTEGRATED & HOLISTIC CARE

## 綜合及整體護理

### Traditional Chinese Medicine for Bone Health

In Traditional Chinese Medicine (TCM), osteoporosis is often seen as a weakness in the body's foundation. It is mainly linked to the **Kidneys**, which are believed to support the bones and bone marrow. As we get older or deal with long-term stress, Kidney energy can become weaker. When this happens, the bones may not get enough nourishment and can become fragile.

The **Spleen** also plays an important role because it turns food into nutrients that keep bones strong. The **Liver** supports healthy blood flow, which helps nourish the joints and tissues.

To support bone health, TCM encourages gentle weight-bearing activities like walking or Tai Chi. Keeping the lower back and knees warm can help energy move smoothly through the body. Good posture and balance are also important to help prevent falls. Eating warm, cooked foods such as dark leafy greens, black sesame, walnuts, and broth are great. It is best to limit cold or raw foods, coffee, and alcohol, since these can weaken digestion and reduce how well the body absorbs nutrients.

Some herbs like DuZhong may support bone health, but they should only be used under the care of a trained TCM practitioner. Herbal treatments should be used together with standard care, not as a replacement.

This information is general and not meant for individual treatment. For a personalized treatment plan, please consult a licensed TCM practitioner.

### 中醫調理助您強健骨本

在中醫理論中，骨質疏鬆常被視為身體「本虛」的表現。此情況主要與**腎臟**有關，因為中醫認為「腎主骨、生髓」，負責滋養骨骼與骨髓。隨著年齡增長或長期壓力累積引發腎氣不足而變得脆弱。

**脾臟**同樣扮演重要角色，負責將食物轉化為營養，供應骨骼強健所需的養分。脾胃好，營養吸收才到位，為骨骼修復提供物質基礎。**肝臟**則有助於維持氣血循環順暢，肝血充足，筋脈才能靈活，保護骨骼免受磨損。

為了加強骨骼健康，中醫建議進行溫和的負重運動，如散步或太極拳。保持腰部與膝蓋溫暖有助於氣血順暢運行。良好的姿勢與平衡能力也十分重要，可幫助預防跌倒。飲食方面，建議多食用溫熱及烹熟食物，例如深綠色蔬菜、黑芝麻、核桃及燉湯等，有助補養身體。應盡量減少服食生冷、寒性食物、咖啡及酒精飲品，這些可能會削弱脾胃功能，影響營養吸收。

一些中藥材如杜仲可能有助強加骨骼，但應在合格中醫師指導下使用。中藥保健只是輔助性質，而非取代標準治療。

以上資訊僅供一般參考，並非個別醫療建議。如需個人化治療方案，請諮詢合格的中醫師。
